Analyst Internship

About our Client

Our client provides business management, economic and financial expertise to major industries, law firms, accounting firms, and governments. They offer business strategy and planning, market and demand forecasting, litigation and regulatory support, policy analysis, and risk management consulting services from offices across Middle East and Europe.

They also provide expert economic and business consulting services to a wide range of electricity and industrial clients. Our work typically involves;

Economic assessments of policies and regulations
Expert reports and testimony for energy-based litigation
Forecasting of energy prices and demand under a range of future scenarios
Merger, acquisition, and divestment planning
Market potential assessments for renewable and unconventional energy technologies

They are seeking a qualified candidate to join their team as an Analyst Intern.

This program is meant to mirror the analyst experience to give you a greater understanding of their business and the type of work they do. Throughout the internship program, you will work closely with both senior and junior staff on project teams and apply economic, financial and business principles to solve real-world problems. They offer a competitive compensation package, professional development opportunities, and a work environment that is collegial and entrepreneurial.

Responsibilities

You are expected to work on many different projects such as:

- Analysing economic and financial data using spreadsheets and databases ensuring the integrity and accuracy of analyses
- Programming, model building, and regression analysis
- Assisting in the production and development of research summaries, expert reports, and the presentation of findings
- Reviewing and summarizing analyst reports, client documents, and industry trade press
- Conducting industry, market, and competitor research
- Performing interview-based research on behalf of commercial clients, government entities, and industry associations

Required Skills, Knowledge & Experience:

They're looking for analytical, highly-motivated juniors majoring in economics, finance, mathematics, accounting, engineering or another quantitative discipline. They place high value on knowledge of economic and financial concepts, research experience, quantitative ability, exceptional written and oral communication skills, and a high level of initiative. they expect Analyst Interns to use data and analysis to
